IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Please amend claims 1-6 and 8-14 as follows:

1.   (Currently Amended) A method for computerized trading comprising:

- ~~a human being using a graphical user interface to enter~~ receiving a plurality of trade parameters, the plurality of trade parameters characteristic of a desired trade ~~for a trading algorithm to input a trading order into a logic engine~~;

- ~~using~~ receiving a selection of a ~~first~~ trade implementation plug-in ~~in said logic engine for implementing the trading algorithm~~;

- loading the selected trade implementation plug-in in a logic engine;

- loading a market-specific plug-in in the logic engine;

- ~~inputting data for said order~~ providing the plurality of trade parameters characteristic of the desired trade to the ~~into said~~ logic engine;

- ~~processing the order~~ determining by the trade implementation plug-in and the market-specific plug-in an order strategy based on the plurality of trade parameters ~~with said logic engine, using said plug-in~~;

- executing ~~said~~ the order strategy; and

- ~~said human being monitoring said~~ providing order data based on the order strategy for display in real time ~~by using said~~ on a graphical user interface.

2.   (Currently Amended) A method as in claim 1, wherein ~~the step of inputting a trading order into a logic engine~~ the plurality of trade parameters ~~further comprises inputting an order~~ are received through an ordering system.

-2-

3.   (Currently Amended) A method as in claim 2, wherein ~~the step of inputting an order through an ordering system further comprises inputting~~ the plurality of trade parameters are received as a ComplexOrder ~~through an ordering system~~.

4.   (Currently Amended) A method as in claim 3, wherein ~~the step of processing the order with said logic engine, using said~~ <u>determining by the trade implementation</u> plug-in[[,]] <u>an order strategy</u> further comprises deconstructing ~~said~~ <u>the</u> ComplexOrder into at least one Event and Action.

5.   (Currently Amended) A method as in claim 1, wherein ~~the step of~~ executing ~~said~~ <u>the</u> order <u>strategy</u> further comprises outputting ~~said~~ <u>an</u> order through an ordering system.

6.   (Currently Amended) A method for computerized trading comprising:

- ~~a human being using a graphical user interface to enter~~ <u>receiving a plurality of trade parameters, the plurality of trade parameters characteristic of a desired trade and received as</u> ~~for a trading algorithm to input~~ a ComplexOrder ~~into a logic engine~~ <u>and received</u> through an ordering system;

- ~~using~~ <u>receiving a selection of</u> a ~~first~~ trade implementation plug-in ~~in said logic engine for implementing the trading algorithm~~;

- <u>loading the selected trade implementation plug-in in a logic engine;</u>

- <u>loading a market-specific plug-in in the logic engine;</u>

- ~~inputting data for said order~~ <u>providing the plurality of trade parameters characteristic of the desired trade to the</u> ~~into said~~ logic engine;

-3-

- ~~processing the order~~ determining by the trade implementation plug-in and the market-specific plug-in an order strategy based on the plurality of trade parameters, ~~with said logic engine, using said plug-in through~~ by deconstructing ~~said~~ the ComplexOrder into Events and Actions by the trade implementation plug-in;

- executing ~~said~~ the order strategy ~~through~~ by outputting ~~said order~~ orders through an ordering system; and

- ~~said human being monitoring said~~ providing order data based on the order strategy for display in real time ~~by using said~~ on a graphical user interface.

7. (Canceled)

8. (Currently Amended) An apparatus for computerized trading comprising:

- a logic engine for processing trading orders;

- an interface to ~~said~~ the logic engine to receive ~~from a human being~~ a plurality of trade parameters ~~for a trading algorithm~~ and to ~~allow the human being to~~ monitor orders in real time;

- a ~~first~~ trade implementation plug-in in ~~said~~ the logic engine for implementing ~~the trading algorithm~~ an order strategy;

- a market-specific plug-in in the logic engine;

whereby ~~said~~ the logic engine processes orders received via ~~said~~ the interface;

wherein ~~said~~ the logic engine, ~~said~~ the interface, ~~and said first~~ the trade implementation plug-in, and the market-specific plug-in are software recorded on computer-readable medium and capable of execution by a computer.

9. (Currently Amended) An apparatus for computerized trading comprising:

- a logic engine for processing trading orders;

- a first interface to ~~said~~ <u>the</u> logic engine for processing orders to receive ~~from a human being~~ <u>a plurality of trade</u> parameters ~~for a trading algorithm~~ and to ~~allow the human being to~~ monitor orders in real time;

- a second interface to ~~said~~ <u>the</u> logic engine for processing orders;

- a ~~first~~ <u>trade implementation</u> plug-in in ~~said~~ <u>the</u> logic engine for implementing ~~the trading algorithm~~ <u>an order strategy</u>;

<u>- a market-specific plug-in in the logic engine;</u>

whereby ~~said~~ <u>the</u> logic engine processes orders received via either of ~~said~~ <u>the</u> first and second interfaces;

wherein ~~said~~ <u>the</u> logic engine, ~~said~~ <u>the</u> first interface, ~~said~~ <u>the</u> second interface, ~~and said first~~ <u>the</u> trade implementation plug-in<u>, and the market-specific plug-in</u> are software recorded on a computer-readable medium and capable of execution by a computer.

10.   (Currently Amended) An apparatus as in claim 9, wherein ~~said~~ <u>the</u> first interface further comprises an Input driver.

11.   (Currently Amended) An apparatus as in claim 9, wherein ~~said~~ <u>the</u> second interface further comprises an Exchange driver.

12.   (Currently Amended) An apparatus as in claim 9 wherein ~~said~~ <u>the</u> first interface further comprises an interface to an ordering system.

13.   (Currently Amended) An apparatus as in claim 9 wherein ~~said~~ <u>the</u> second interface

further comprises an interface to an ordering system.

14.   (Currently Amended) An apparatus as in claim 9 wherein ~~said~~ <u>the</u> logic engine further

comprises a Core Processing Area.
